– 14,692 sq ft / 1,365 sq m

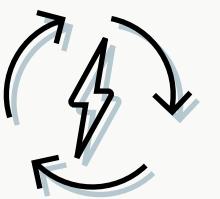

FIRST FLOOR
Tech sample fit out
– 14,692 sq ft / 1,365 sq m

EQ, BRISTOL'S MOST SUSTAINABLE OFFICE

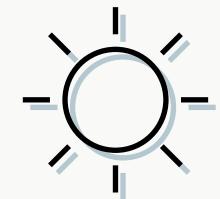

Bristol's pioneering, all-electric office, has no gas or fossil fuels burned on site. EQ uses cutting-edge technology and green energy and has been designed to be Net Zero Carbon in Operation.

The ambition of EQ is to establish and improve 'in use' energy and environmental performance. This is captured through regular landlord and tenant forums with attendance by other stakeholders as well, which enable discussion and data sharing on energy, water use, waste production and recycling, amongst other matters.

All-electric building

Green energy supply.
EQ does not burn any gas or fossil fuels on site.

Renewable Energy

600 sqm of PV panels generating electricity to power the common parts.

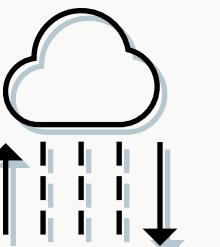

Greener commute

Our 263 cycle spaces, excellent shower provision and 32 car charging points could save 1,700 tonnes of carbon each year.

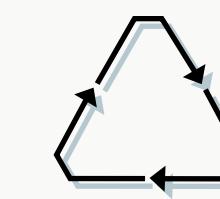

100% fresh air

Our smart technology enables ventilation control according to the occupancy of each office.

Rain water collection

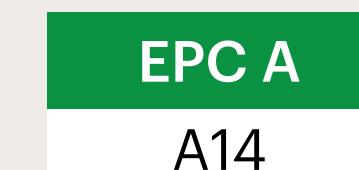

We collect and reuse rain water for toilet flushing, which could save 2,000 litres of water per person each year.

Zero landfill

We can save 460 tonnes of waste from going to landfill each year by recycling everything via our waste management partners.

ACCREDITATIONS:

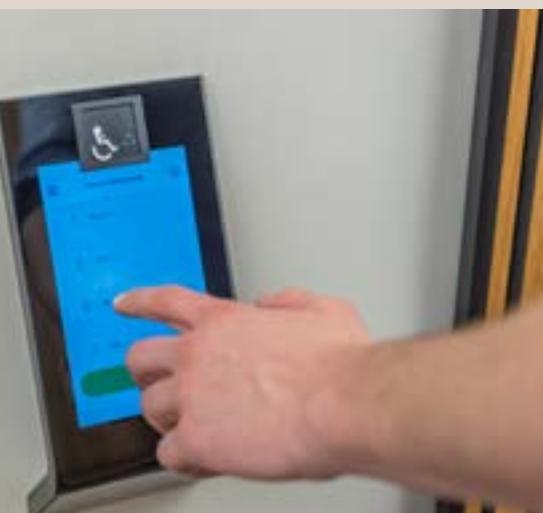

EQ TECHNOLOGICALLY ADVANCED: DIGITAL READY AND SECURE.

Smart building systems and data-rich technology optimise productivity and operational efficiency.

BUILT FOR PERFORMANCE:

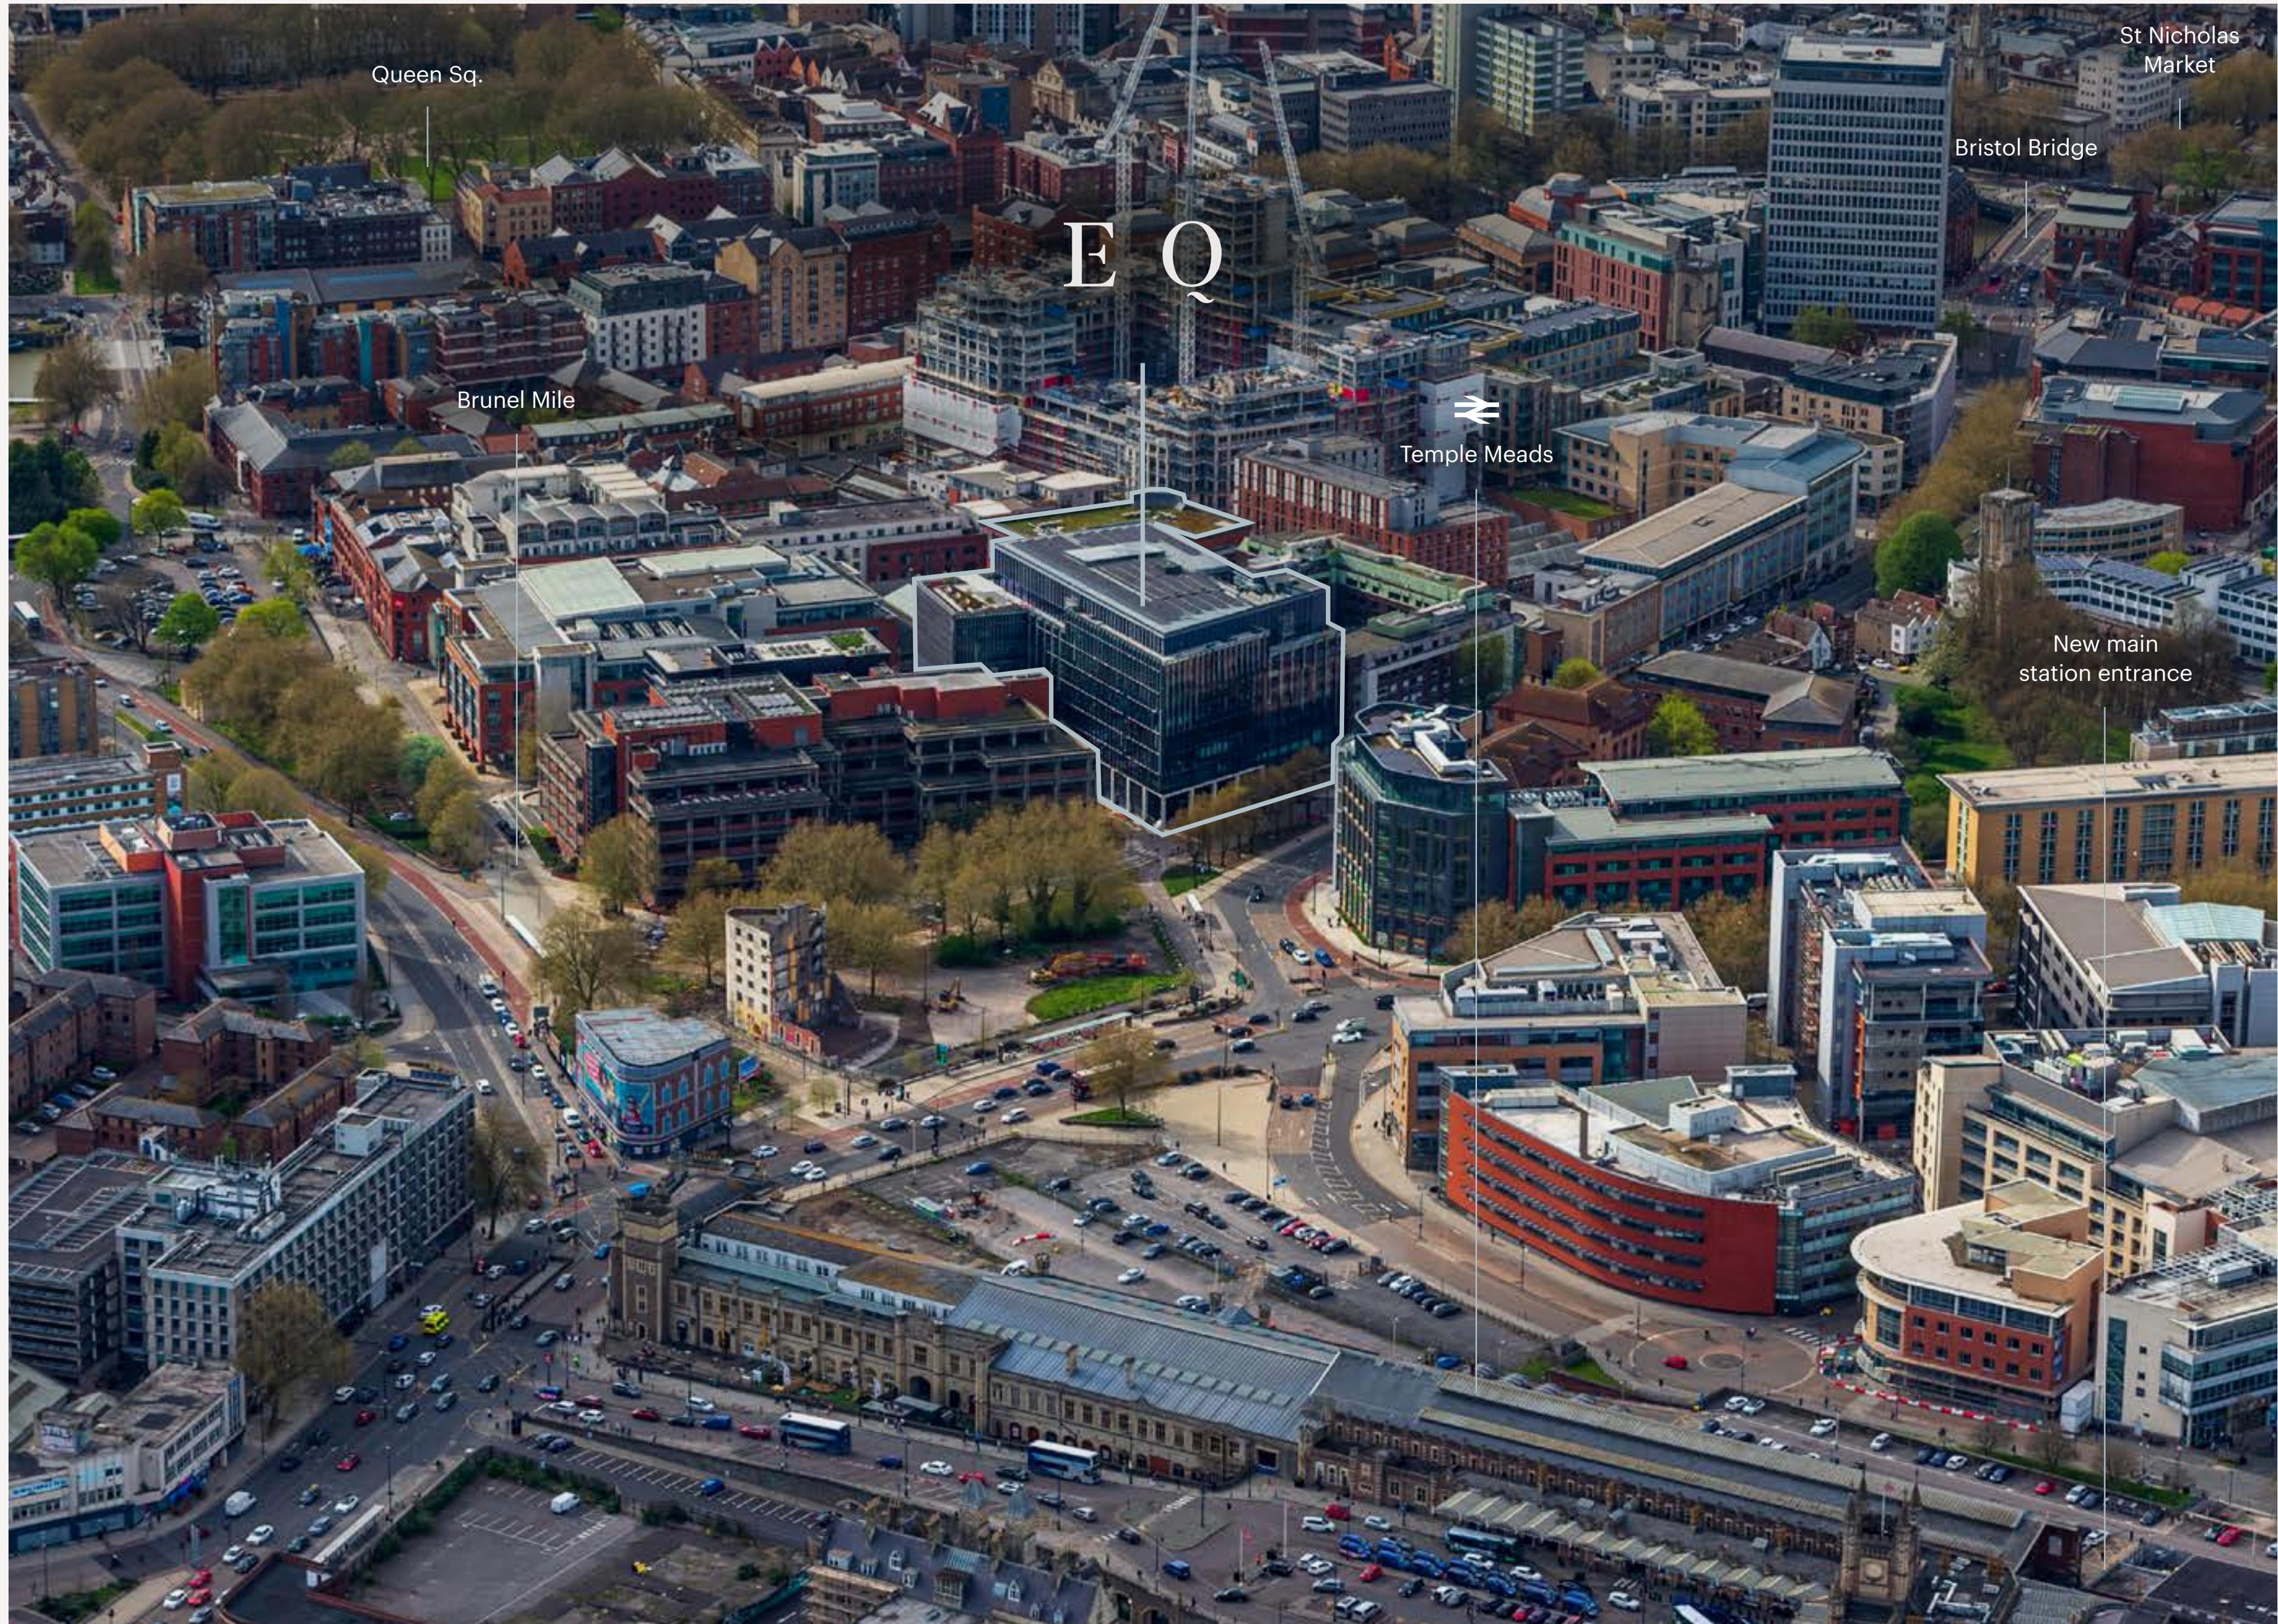

- Floor-to-ceiling advanced glazing and excellent natural light
- Integrated smart technology and intelligent LED lighting
